CONTENTS

No. 1, January, 1924

A Study of the Decomposition Products of Spore-Bearing Bacteria in Heated Milk. Henrietta Lisk 1
A Morphological, Cultural and Biochemical Study of Representative Spore-forming Anaerobic Bacteria. George F. Reddish and Leo F. Rettger .. 13
Correlation of Citrate Utilization by Members of the Colon-Aerogenes Group with Other Differential Characteristics and with Habitat. Stewart A. Koser 59
The Character of Acids Produced by Hemolytic and Non-hemolytic Streptococci from Pathogenic Sources and from Milk. Bertha Langwill 79

No. 2, March, 1924

Some Questions of Method in Bacteriology. E. G. Hastings 95
Studies of the Streptococci. VII. A Medium for Stock Cultures of Streptococci and Other Bacteria. S. Henry Ayers and William T. Johnson, Jr. 111
Studies of the Streptococci. VIII. A Note on Hydrogen-sulphid Production by Streptococci. S. Henry Ayers and William T. Johnson, Jr. 115
The Motility of Bacteria as Affected by Hydrogen Ion Concentrations. Guilford Reed and D. J. MacLeod 119
The Quantitative Action of Enzymes of Seven Specific Organisms upon the Proteins of Milk and upon Gelatin. E. H. Parfitt and George Spitzer ... 123
The Fermentation of Galactose by *Saccharomyces cerevisiae*. N. L. Söhngen and C. Coolhaas 131
The Penetration of Bacteria Through Capillary Spaces. II. Migration Through Sand. Shields Warren and Stuart Mudd 143
The Penetration of Bacteria Through Capillary Spaces. III. Transport Through Berkefeld Filters by Electroendosmotic Streaming. Stuart Mudd 151
A Description of a Self-Ventilating Constant Temperature Incubator Room. Lloyd D. Felton 169
Coagulation and Sterilization of Loeffler's Medium in the Autoclave. Martin Dupray 179
A Study of a Bacterial Association. I. The Biochemistry of the Production of Lactic Acid. H. B. Speakman and J. F. Phillips 183

No. 3, May, 1924

The Detection of *Bacillus botulinus* and *Bacillus tetani* in Soil Samples by the Constricted Tube Method. Ivan C. Hall and Emelia C. Peterson .. 201

The Discoloration of Brain Medium by Anaerobic Bacteria. Ivan C. Hall and Emelia Peterson..... 211
Further Observations on Liquefaction of Gelatin by Bacteria. Max Levine and F. W. Shaw..... 225
Hydrogen Sulfide Determination in Bacterial Cultures and in Certain Canned Foods. C. R. Fellers, O. E. Shostrom and E. D. Clark..... 235
Nitrification and the Nitrifying Organisms. I. R. Nagan Gowda..... 251
The Number of Generations Necessary for the Development of the Power of Aerobic Growth by *Bacterium abortus* (Bang). Amanda Harms..... 273
Studies on Pasteurization. XI. The "Majority" and "Absolute" Thermal Deathpoints of Bacteria in Relation to Pasteurization. S. Henry Ayers and W. T. Johnson, Jr..... 279
Studies on Pasteurization. XII. Cause and Significance of Pin-point Colonies from Pasteurized Milk. S. Henry Ayers and William T. Johnson, Jr..... 285
A Note on a Simple Method for Obtaining Uncontaminated Samples of Intestinal Contents from Various Levels with a Duodenal Tube. R. G. Freeman, Jr. and E. G. Miller, Jr..... 301
The Function of Lag in Bacterial Cultures. James M. Sherman and William R. Albus..... 303
The Van Slyke Method for the Determination of Amino-Acid Nitrogen as Applied to the Study of Bacterial Cultures. R. W. Lamson..... 307

No. 4, July, 1924

The Ostwald Viscosimeter for the Determination of the Liquefaction of Gelatin by Bacteria. Frederick W. Shaw..... 315
Clostridium putrificum. III. A Comparison of Strains obtained from Collections in this Country and Abroad. George F. Reddish..... 321
The Fate of Bakers' Yeast in the Intestine of Man and of the White Rat. Leo F. Rettger, George F. Reddish, and James G. McAlpine..... 327
A Bacterial Disease of Silkworms. R. W. Glaser..... 339
Comparative Study of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. Walter L. Kulp and Leo F. Rettger..... 357
The Variation in Size of Lytic Areas and its Significance. Philip Hadley... 397
A Methód of Staining Lytic Areas Produced by the Bacteriophage. Philip Hadley..... 405

No. 5, September, 1924

Antigenic Relationships of *Bact. typhosum*. II. Complement-Fixation. Elliott Stirling Robinson..... 409
Experimental Method for the Cultivation of Microbes in Agar Cylinders in the Peritoneal Cavity of Animals. J. Ørskov..... 427
Studies on the Biology of Sewage Disposal. A survey of the bacteriological flora of a sewage treatment plant. Margaret Hotchkiss..... 437
Studies on the Biology of Sewage Disposal. A Sprinkling Filter Bed and its Bacteriological Population. Margaret Hotchkiss..... 455

The Chemical Mechanism of Bacterial Behavior. I. Behavior Toward Dyes—Factors Controlling the Gram Reaction. Esther Wagner Stearn and Allen Edwin Stearn 463
The Chemical Mechanism of Bacterial Behavior. II. A New Theory of the Gram Reaction. Esther Wagner Stearn and Allen Edwin Stearn .. 479
The Chemical Mechanism of Bacterial Behavior. III. The Problem of Bacteriostasis. Allen E. Stearn and Esther Wagner Stearn 491
Heating to Facilitate Measurement of Precipitates. Jean Broadhurst 511

No. 6, November, 1924

Acid-Forming Streptococci as Indices of Fomites Pollution. C.-E. A. Winslow and Dorothea H. Sanjiyan 513
Bartolomeo Bizio's Letter to the Most Eminent Priest, Angelo Bellani, Concerning the Phenomenon of the Red-colored Polenta. Translated from the Italian by C. P. Merlino 527
The Type Species of the Genus *Serratia*, Commonly Known as *Bacillus prodigiosus*. R. S. Breed and Margaret E. Breed 545
The Effect of Some Electrolytes on the Buffering Power of *Bacterium coli*. H. J. Shaughnessy and I. S. Falk 559
The Effect of Environmental Changes on the Growth, Morphology, Physiology and Immunological Characteristics of *Bacterium typhosum*. Charles A. Stuart 581
